

Parcel Detail Reporting & Inquiry Database Now On-Line

N&C now provides with the ability to capture, track and report on ANY parcel invoices, shipped any service level, received via EDI for any carrier.

Our Parcel Inquiry Tool gives you the ability to lookup an individual tracking number or entire invoice. Once connected to the Parcel database, click-on the search that you want to perform, enter your invoice or tracking number and the results will display in your browser.

The Parcel Reporting Tool allows you to create a report formatted to your specification, displaying only the fields that you want in the order that you want them and export them in one of many available formats or displayed in your browser. We have included a powerful data filtering function that will streamline the data to return only the information needed. No more scrolling through thousands of lines of data to find the required shipment detail.

These reports can be saved and edited to allow for additional fields or data filters to deliver the results you need every time!

The reporting and inquiry database can accept files from UPS, FedEx or DHL in either their proprietary format (UPS Flat File) or traditional EDI.

To get started using this powerful analysis tool, please contact either Jon Vigliarolo at (586) 501-3133 or jonvig@nandc.com or Lisa Beam at (586) 501-3123 or lbeam@nandc.com
